

The Facts

- There are currently approximately 1,278 homeless households in the St. Louis region.
- Family homelessness is one of the fastest growing segments of the homeless population fueled by lack of affordable housing options and living-wage employment opportunities.

Our Mission

Humanitri, as Christ's hands of mercy, helps families facing homelessness achieve stability in a safe and supportive community, providing the skills and resources they need to thrive.

Our Vision

All families live with dignity and hope for the future.

Our work is about transformation. We believe that EVERY individual created and loved by God deserves to be treated with dignity and respect and given the opportunity for a new start.

We stabilize families in crisis through a holistic approach that includes skill development, a support network of professionals, and temporary housing all designed to help them establish sustainable life change. Through our programs, adults and children address the root cause of their situation, develop critical life skills, learn to navigate everyday situations, and work together to achieve goals so they can look forward to a more promising future.

Our Programs

Together Achieving Goals (TAG) focuses on skill development for children and youth and uses a combination of independent learning and in-person visits to strengthen abilities in key areas and equip them to achieve a more equitable future.

Humanitri
TRANSFORMATIONAL HOUSING

Transformational Housing focuses on stabilizing and transforming families in crisis. From intake through launch, we support our families in their desire to achieve change and TRANSFORMATION.
